Terms of Use in a nutshell

You can freely use this SOFTWARE in its binary form for your own business but you are not allowed to modify the GUI for your own branding.

To use it for commercial purpose and/or for allowing your own branding you need to acquire commercial license which we are happy to discuss.

Vinge Free AB is not taking any obligations to provide technical support to you for using this SOFTWARE. However, limited free support is available through [forum](#) which is open to community and also monitored and answered by Vinge Free staff.

Vinge Free offers commercial support in terms of

- solving issues related to functionality of the SOFTWARE
- training in best use of the method and SOFTWARE for teams
- extensions of the features
- custom development of solutions for your business using this SOFTWARE
- consulting about usage of the SOFTWARE as a part of the solutions

Source code is not available at this point through any Open Source licensing, but we do provide source code under commercial license based on individual agreements.

If you want to re-implement the Explore & Query method yourself, beware that this is IP of Vinge Free AB and is currently patent pending.

Feedback

We are very interesting in user's feedback and feature requests to get the right focus in further improvement of the method and the SOFTWARE. We are even very likely to work for you and with you to get you wishes realized.

Upgrades

We classify the current version as alpha. This means the base functionality is there and it is stable enough to be useful but we are also having many ideas how to add

more useful features and improve the performance of the users. We act in a very agile manner as this is what our SOFTWARE is about: supporting the needs of agile analytics.

So this said, expect lot of upgrades and frequent improvements, not least based upon your feedback.
